## A deep dive into Digital Project Delivery and how technology is transforming the construction industry.

The construction industry is at a critical inflexion point, with technology redefining how projects are planned, executed, and delivered. Digital Project Delivery (DPD) is at the heart of this transformation - leveraging cloud-based solutions to connect teams, data, and workflows for more efficient, collaborative, and successful project outcomes.

Join us for an exclusive strategic leadership dialogue where Autodesk experts and industry leaders will deep dive to explore how Digital Project Delivery (DPD) is empowering real estate developers and general contractors to:

The exclusive CXO session, where experts and industry leaders will explore how Digital Project Delivery (DPD) is empowering real estate developers and general contractors to:

- Reduce project delays and cost overruns with real-time data and automation
- Enhance collaboration between teams through a secure Common Data Environment (CDE)
- Streamline project workflows - from design coordination to construction management
- Leverage AI-driven insights for risk mitigation and operational efficiency

This closed-door forum is designed for high-impact dialogue, peer learning, and real-world insights with no presentations but only meaningful conversations. This impactful engagement will be followed by an exclusive demo of **Autodesk Construction Cloud (ACC)**, showcasing how a connected ecosystem can help construction professionals gain better control over their projects.

## AGENDA

| TIME          | SESSION                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 18:40 – 18:50 | Setting the Tone & Opening Address by AutoDesk Construction Cloud Leadership                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 19:00 – 20:15 | <p><b>Leadership Dialogue Session: Reimagining Construction - The Digital Edge</b></p> <p>Brief: As Chennai strengthens its stature as India's technology capital and innovation hub, the city's real estate and infrastructure ecosystem is undergoing rapid transformation. With the growth of integrated mixed-use townships, expanding metro rail connectivity, tech-enabled Grade-A office spaces, and sustained investments in IT/ITeS clusters, aerospace, fintech, and emerging data-centre parks, the need for digital transformation in construction has never been more compelling.</p> <p>This session examines how leading developers, EPCs, and urban agencies in Chennai are embracing BIM, CDEs, digital twins, IoT, and AI-powered project controls to enhance stakeholder collaboration, mitigate risks, and drive efficiency across the build lifecycle– from design and approvals to execution and asset management. Anchored in real-world case studies and regional insights, we'll spotlight the digital strategies reshaping Chennai's urban landscape and setting new benchmarks for sustainable, scalable, and future-ready development.</p> <p><b>DISCUSSION FOCUS:</b></p> <ul style="list-style-type: none"><li>• Adoption of cloud-based solutions for seamless collaboration and efficiency</li><li>• Overcoming delays, cost overruns, and miscommunication with digital tools</li><li>• Leveraging real-time project data for improved decision-making and reduced rework</li><li>• Enhancing productivity with AI-driven insights, predictive analytics, and automation</li><li>• Preparing for the next era of construction with scalable, tech-enabled strategies</li></ul> |
| 20:15 – 20:30 | QnA Session                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
