## A deep dive into Digital Project Delivery and how technology is transforming the infra & construction industry.

India's infrastructure sector is witnessing unprecedented growth across transportation, rail, metro, highways, airports, ports, energy, and urban development. As project complexity increases, infrastructure owners, EPC contractors, and project teams are under pressure to deliver projects faster, safer, and more efficiently.

Join Autodesk and industry leaders for an exclusive discussion on how Digital Project Delivery (DPD) is transforming infrastructure development by connecting people, processes, and data across the project lifecycle.

### Key Discussion Areas

- Reducing project delays and cost overruns through real-time project visibility
- Enhancing collaboration through a secure Common Data Environment (CDE)
- Improving project controls, governance, and execution across complex infrastructure projects
- Leveraging AI-powered insights for risk mitigation and operational efficiency
- Accelerating digital transformation across EPC and infrastructure organisations
